

VAX

VERSUS

FICTION

VACCINE FEARS VS. VACCINE FACTS

The vaccine is unsafe because it was rushed.

Efficacy and safety were fully tested and born out since.

You can get COVID-19 from taking the vaccine.

You cannot. The vaccine contains no live virus.

The vaccine puts a microchip in your body to track where you go.

The microchip is inside the syringe label, not the vaccine.

Taking the vaccine will alter my DNA.

mRNA in the vaccine triggers the immune system, but never penetrates your DNA.
