

THE TECHNOLOGY YOU'VE BEEN MISSING

THE RECOVERY HOUSING PORTAL

A wealth of new tools to expand and improve rural recovery housing.

FULFILLING OUR MISSION

As part of our mission to build the capacity and quality of recovery housing in rural America, the Fletcher Group RCOE is happy to announce the launch of our new "RH Portal" where exciting new tools will enable RH operators, clients, researchers, and policy makers to promote quality standards and best practices while bringing new efficiency to facility and service management.

NEW!

YOU'RE INVITED!

Feel free to use the links below to enjoy all the valuable tools the new cutting-edge technology has to offer. And be sure to share the news with others so that every rural recovery residence in America can benefit.

WWW.RECOVERY-HOUSING.ORG

EASY DOES IT!

Accessible anytime from anywhere, the new technology is the result of a close collaboration between the Fletcher Group Rural Center Of Excellence and the University of Kentucky Injury Prevention and Research Center.

WIN-WIN FOR EVERYONE

Whether you're an individual looking for a recovery residence, an RH manager needing best practice training and state-of-the-art record keeping, or a researcher seeking nationwide data, you'll find it all at the new RH Portal.

TAKE RH TO THE NEXT LEVEL WITH OUR NEW

LEARNING CENTER

A NEW YEAR, A NEW YOU!

Our new online Learning Center provides a wealth of valuable courses to help you create, operate, and manage recovery housing at the highest level. Our team of Subject Matter Experts and professional partners have developed a robust course catalog hand-tailored to the needs of rural recovery house residents, owners and operators, and the friends, family and community members who support them.

BUILT EXPRESSLY 4U

The training is designed modularly around micro-learning principles so you can learn and grow at your own pace no matter how busy your schedule.

How To Best Manage A Residence

A variety of courses to help you create and maintain a positive, healthy and nurturing environment in houses both small and large.

How To Deliver High-Quality Services

Designed to help rural recovery houses conduct sensitive operations with full accountability and professionalism.

How To Support Individuals While Building Community

Courses to help rural recovery residents, graduates, family, and friends build individual recovery capital as well as vibrant community support.

For free educational materials and courses designed for you..

FIND THE IDEAL RESIDENCE AT OUR NEW

HOUSING REGISTRY

FIND IT FAST!

Those in need of a supportive living environment to recover from a Substance Use Disorder can now find it in seconds, thanks to the Fletcher Group RCOE's exciting new "Housing Registry." With just a few key strokes, the user-friendly Search Tool scans all available recovery houses within or near your rural community and lets you narrow your search with easy-to-use filters.

DOUBLE-DUTY

Owners and operators who list their residence on the registry can take the additional step of signing up for our new Recovery Management System—the third leg of the RH Portal—that enables them to record daily operations with state-of-the-art efficiency. In addition to streamlining record-keeping, the tool can also be used to solicit and receive advice regarding all manner of RH best practices. (Although a fee will eventually be charged to access the system's full functionality, your first-year costs will be covered by the Fletcher Group RCOE.)

A NATIONWIDE OUTCOMES DATABASE

Once it's up and running, the tool will also provide researchers with the nation's first coast-to-coast database with which to develop and refine evidence-based best practices. (The confidentiality of residence data will of course be fully protected.)

EVERYONE WINS!

As an online clearinghouse for any and all information related to recovery and recovery housing, the tools provided through the RH Portal—including training, housing registry, management system, and database—will help fulfill our commitment to expanding the capacity and quality of recovery housing throughout rural America.
